

Our FAQ is listed below. Here is what we offer you as an artist:

ALL TEXAS MUSIC offers an artist an added means of distribution, and added exposure, for an artist's recordings, in our remastered MP3 format only.

Paypal takes out 2.9% + \$0.30 PER TRANSACTION. We keep \$2.50 for a \$15 album. ALL TEXAS MUSIC offers the rest of the sale of any recording to the musician/band.

ALL TEXAS MUSIC will also submit your recording to a Satellite Radio company for screening. Accepted material will pay you for airplay of your music. See FAQ below.

We offer payment each month on your sales by issue of a payment direct to you (your account etc) via PayPal. Of course, we only send payments to those artists whose recordings have been sold each month.

We do not require a contract. We do have a Legal Agreement if you require one, which restates the above.

We encourage artists to repeat our name in live shows and on social media: you drive your own sales, we help!

FAQ

About Us: All Texas Music (ATXM.CO) was founded by and for Texas Musicians in 2005. While most of the world knows Texas for Country Music, we also know Texas has great Rock, Jazz, Classical, Ambient, and all other genres. This is our mission, to show the diversity of Texas Music. We offer high quality MP3 downloads online in our store.

We do not offer radio hits, we do not offer rap, as they are over-exposed already. We offer good music that you will not hear in radio repetition/rotation.

What about CD Sales? Fine by us, we feel that CDs are now regarded as a business card for musicians, which is why CD stores are pretty much extinct.

What about CD Baby, Reverbnation, iTunes etc? We are simply an added means of distribution, the other places you sell your music is your business. However, we point out that any service, which plays your full songs online, is giving away something you want to sell. *ATXM plays SONG SAMPLES* instead of giving away your recordings.

What about sound quality? All Texas Music is famous for our special process of remastering to create high end, audiophile quality MP3 format files. Most MP3s are “ripped” meaning a high speed process that takes most of the sound quality out of music. We use professional mastering to create an MP3 that sounds as good as the original master (or better). One listen to our website players will prove it!

Give more details about Satellite Radio: We are partnered with EOS Satellite, which is owned by the same parent company that owns Sirius/XM. www.EOSmusic.com EOS provides music for businesses, offices, restaurants and more. You are paid “per play” of each song accepted by EOS, and they choose which channels your songs fit. EOS has a screening process and may not accept all submissions.

Like any other radio, EOS requires that you grant them ownership of mechanical and duplication rights. This does not mean that ATXM or EOS owns the songs or compositions in any way; it simply grants permission to play material in exchange for royalties. When you send us your CDs, your submission grants those permissions.

What about web promotion? All the music in our store is played in iPhone-friendly music players, playing samples of your music! All Texas Music is present on Facebook, Twitter, Digg and other social media services. We make effort to draw attention to the website music store each day.

Additionally, we have available, low-cost services to promote you as an artist, directly to these social media services, including HD videos for your album. For more details, contact us at artists@alltexasmusic.com

Again, if you send your CDs to us, we ask that you mention our website as the place to buy your songs. Promote in your concerts and online in social media. Help us help you!

To send your material to ALL TEXAS MUSIC, mail your CD to us at the address below. If your CD is not professionally duplicated, send us a separate CD with your cover art.
